## 1 | Facing East

### 1.1 | Questions and Comments

- A Euro-Centric Perspective prevails
- Praising of capital system, which is ultimately not a part of the native systems

## 2 | Dumbbar-Ortiz

### 2.1 | Expertise

Born half native-american, but not raised with Native American culture. Argues that the Native American technologies were really advanced, and they had advanced technology and trade.

### 2.2 | Claim

Evidence of planting and trade was advanced; used the example of corn shows the innovative and advanced means by which it is planted.

Not saying Native American tech is better, but it was simply different. "Technology": three sisters, for instance, is an innovation but are often not defined as a technology.
